Your Favorite Mac Features, On the PC

Are you a Mac user that frequently has to work on PCs? Does it ever annoy you to have your fingers default to familiar keystrokes, only to forget that you're using a PC? Everything goes haywire, application windows open, close, or resize, and you have to mentally adjust your workflow!

With **maComfort**, you can once again enjoy all of the keyboard shortcuts of your Mac even as you suffer under the burden of working on a PC! maComfort emulates nearly all Mac OS hotkeys and key combinations on a Windows PC, letting you use those great features such as virtual desktops or Quicklook. Forget about accidentally hitting the Windows key - maComfort makes it function exactly like the Command key on an Apple keyboard!

Even if you've never even touched a Mac before, you'll benefit from the emulation that maComfort provides! Quicklook, Spaces, active corners, all of these features that Mac enthusiasts have enjoyed for years can be yours, without buying a Mac! Preview files just by hitting the space bar! Organize windows into different virtual desktops! Imagine programming the corners of your screen to toggle specific actions - it's called Active Corners, Mac users love it, and with maComfort, you can enjoy it too!

Additionally, maComfort Standard and Premium don't just give you Mac functionality on a Windows system, they also let you completely customize its look and feel! You have the freedom to create your own theme, or pick from any of the themes available on the web! You can even extend the utility of **maComfort Standard or Premium** using plug-ins!

Written by Derek Lee

maComfort Press Pack

maComfort lets you:

- **Bring the convenience of Mac functionality** to your Windows keyboard and workflow.
- **Utilize traditional Mac features**, such as Quicklook, Active Corners, and Spaces, on your PC.
- **Save time** by avoiding common keyboarding errors.

Who Needs maComfort? You do if you ever:

- Use Macs all of the time, but are required to use PCs on a routine basis.
- Do not own a Mac, but want some of the cool features available to Mac users.
- Want to make your PC look and feel more like a Mac.

Product Statement (37)

maComfort makes Windows feel like Mac

Description (80)

Bring Mac to Windows: Quicklook, Spaces, Active Corners, Mac key combinations...

What others say - Testimonials

“ If you are in desperate need to get Mac feeling on your Windows or you are having dual operating system with Windows and Mac and get uncomfortable with Windows keys then this software is really helpful to make things easier for you.

- Sourojit Nandi / [Blogsolute](#) ”

“ This will really help if you, like me, hate using Windows.

- [Greg](#) ”

“ love it!

- gema, comment on [MakeTechEasier](#) ”

“ I love maComfort! It's made being at work so much more bearable!

- Rex Barkdoll, via online form ”

“ maComfort is an interesting program for Mac and Windows users who want to use some features that the Mac operating system provides under Windows.

- Techzond.com ”

maComfort Press Pack

“

changed the number of spaces to 2 and it now only uses 6k of ram. compare that to launchy that is taking up 34k of ram, it seems like a solid addition to my computer.

– kaslings, comment on [TUAW article](#)

”

“

maComfort gives you literally the comfort of a MAC, because it will add all the MAC shortcuts to Windows 7. It will also add active corners to assign special functions to each corner and you can preview files just as if you were using a MAC. Virtual desktops is another great MAC-only feature that I would like to see in Windows 8.

– review on [Windows7Themes.net](#)

”

“

I switched to a Mac several years ago and never looked back. Unfortunately, I have to switch between my Mac and a PC at work regularly. Now I can keep my Mac features while I use my work PC. maComfort lets me enjoy Quicklook, Spaces, Active Corners and my keyboard command on the PC. Check it out!

About the author – Rafael Leonardo Klaus

Started in 2006 and based in Bremen, Germany, *Rafael L. Klaus* has been developing feature-rich applications for Windows and Mac that target very specific user groups.

All programs were made to solve one or more tasks that no other application would focus on, while still maintaining the highest quality standards possible - as if there was competition.

Freeware for Mac includes the popular Camino prefPanels "Settings Plus" and "CamiNoScript". Windows programs include the commercial tool "GameStarter" for FPSC users.

maComfort has been the latest innovation of this one-man software crafter, and is the first tool to target users who switch between Mac and Windows.

Apart from developing apps, *Rafael L. Klaus* is into web design and also takes photographs which he exhibits (and sells).
